Subject: Goat with **very serious skin condition.**

Hi there.

We have a goat, **Eileen**, who has had a skin condition for **over 18 months.**

It started as a small patch of hair loss and very dry skin and has now spread to both sides of her body over a large area. The area is **now scaly, red and sore.**

Despite using various [REDACTED] [products/applications], including [REDACTED] [numerous sprays, pour ons, harsh products] and an assortment of creams, nothing works.

She has had skin scrapes and nothing was conclusive but vets thought it was a mite of some description.

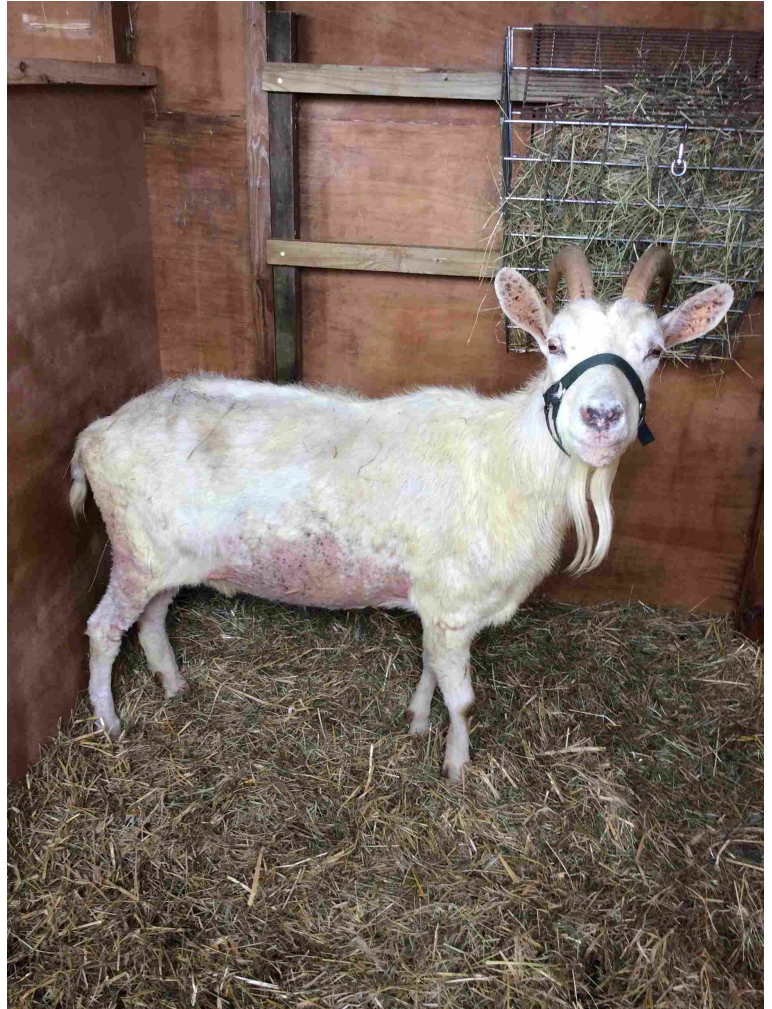

Can you help?

Regards Sheilaon behalf of **Rainbow Animal Sanctuary.**

[R&SL Note: we recommended Starter Pack 1-H Trigger (Ruggle-it starter pack with the all important 'pure' Protexin probiotics) due to the duration of struggle, the severity of skin irritation, stress of Eileen.]

Hi Karen,

We appreciate all your efforts and the **free gift** for Eileen and am sorry I didn't get back to you sooner.

I know it's **early days** and at the moment difficult to judge but we **think Eileen is improving**, at least she seems **more settled** and for the **first time** in ages **have hope that she will overcome this horrible thing**.

I will let you know how she goes on and again many thanks.

Sheila

We are getting there. **Thank you so much.**
Much love from Caroline and Sheila and **"hairy" Eileen** and all of us at Rainbow.

[R&SL Note:

1st 'hairy' **AFTER** photo (immediately above) is of the same right hand side of Eileen as the 'before' image on Page 1;

2nd 'hairy' **AFTER** photo (on the right) is of Eileen's left hand side.

Apologies for PDF of this 2nd image with odd colouring...in attempt to try to keep file size down, it distorts the image – high res' image available from the office if you require it.]

Many thanks to **Sheila & Caroline at RAINBOW Animal Sanctuary, Shaftesbury, Dorset** for taking the time to write these feedbacks & include **before & after** photos.
