Hi there, just a little info which you can do what you want with.

Jester is a 30 year old Welsh section D who has lived with us for the last 10 years. He had been a driving pony in his previous life and a happy hacker for me right up until last year when he became suddenly very lame. The Vet diagnosed [REDACTED] to his [REDACTED] [lower leg] in March, he was already somewhat [REDACTED] [showing signs of ageing joints] and I was led to believe I did not have much longer left with him.

I decided to just enjoy every day I still had with him.

He is on your **Pernamax Equine [Maxavita Green Lipped Mussel (GLM) tablets]**, [REDACTED] and [REDACTED] daily and is **doing really well thank goodness.**

He has been retired but is **sound once more despite expectations** which were very gloomy to say the least and I am hoping to get him out for gentle in hand walks in the woods again later in the year.

He has to be discouraged from behaving like a youngster and will belt around the field if I am not careful!

To be honest I am not sure which of the supplements is helping the most so keep him on all of them in the fear that if I cut one out it might be the one that is making the difference!!

He is the bay in my photo.
