Hello Karen

Almost got to the end of our first "test bottle" of your shampoo, each of our eight dogs (Bearded Collies and one Portuguese Water Dog) has had a at least one bath in it (except for our oldie aged 13), the itchy ones have had two, and I can report back that the **scratching and nibbling is much less already** [purchased 15/12/08] On my 8-yr old's back where she was much troubled with **fur mites** I used the salve then shampooed it away two days later, result was **smooth pink skin and within another couple of days a regrowth of hair was beginning** in the area. Have taken your advice and used a little of the salve inside the earflaps and under the tails.

**Seems to be the best thing I have ever used against mites** - we have had an ongoing problem with **fox and rabbit mites** for two summers now, as the areas where our dogs are walked are full of foxes and rabbits and with hairy dogs once the mites have taken hold it seems hard to shift them without resorting to chemical means which I am not keen to do. I have also to report have **not seen a sign of a flea** either - I know it's not particularly the season for fleas but we do have a **grooming parlour** here and our customers' dogs bring us fleas all year round!

A couple of our dogs are **regularly shown** and I was hoping that their correct harsh coat texture would not be affected by the shampoo, **pleased to say this isn't a problem.**

In the meantime I think it is something I would like to have in our **grooming parlour** as a standby, I'm sure it will be suitable on other breeds as well and feel ready to give it a try. So could I please order a larger size of shampoo this time round? Still have plenty of the salve though. Seems it will last for ever.

Best wishes and thanks for great **products which really do what they say they do!**

Liz
